

# WELLSPACE HEALTH *Connect!*

## Available for Your Convenience

WellSpace Health offers our patients easy and secure access to their medical information through the internet - it's called a "Health Portal".

As a patient of WellSpace Health you are able to privately view your health information online.

To gain access simply sign-in using the temporary credentials provided during your visit or let your care team know you would like to connect.

And, become even more in control of your health by viewing your health information and education resources from any computer or smartphone with an internet connection!

## Online Access

*"Keeping Our Patients at the Center of Their Care"*
